About project

The project Employment for me "EMforME" is being organised on the initiative of organisation SYTEV on the basis of need to solve the situation. Sensitive perception of impulses from community and a lot of practical life skills led to choosing general point of our Youth Exchange, which is to help the European young people lead a better, more full-fledged life. The background behind the realisation of this project is really varied. Our six-membered group of active and ambitious people in the age of 17-25 have been trying to create the project for several months. The aim was to create a project, which is not only attractive and interesting but also good-quality and enriching for young people.

Project is made from Youth Exchange itself in the days of 08. 06. 2018 - 18. 06. 2018. In order to promote the beautiful Slovak nature and our potential to provide foreign tourists breathtaking views, delicious gastronomy and surpassing experiences, we have decided to situate the project in the northern Slovakia. City Oščadnica provides accommodation spaces, including the common room. Meals will be served five times a day, with snacks and all-day drinkable regime. It will be catered for young people with food allergies and special diets.

Together 36 Europeans from the countries of Slovenia, Romania, Lithuania, Poland and Slovakia will participate on the Youth Exchange.

The used methodology will be provided by the non-formal education. Thematic workshops, opened discussions, self reflection, presentations, mutual sharing of information and real communication will add to the building of lot of positive abilities of participants. The taking away of new knowledge and findings, clearing multicultural friendships and improving standing on labour force is guaranteed.
