## **COUNTRIES**

### **Participating Countries:**

SLOVENIA  
LITHUANIA  
SLOVAKIA  
CZECH REPUBLIC  
POLAND

### **Summary of the Project:**

We believe that thinking about protecting the environment, reducing waste, raising awareness about reuse and developing innovative solutions for recycling waste are becoming increasingly important in times of excessive consumerism.

Participating in this youth exchange will help young people to become more familiar with the topic of recycling waste materials and to jointly explore and learn about different innovative solutions for waste reduction, reuse and recycling. It will also encourage them to become aware of the importance of strengthening their competences, intercultural awareness, personal development, empowerment and active citizenship. The aim of the youth exchange is to encourage young people, to learn about their personal development and growth, and to become active members of their communities, contributing their share to improving the environment and reuse and recycling of waste materials.

This youth exchange will take place in Salovci, Slovenia and will bring together young people from five European countries: Slovenia, Lithuania, Slovakia, Czech Republic and Poland.

Through this project, young people from 5 countries will live together for 11 days. Project will enable young participants to debate about the topic of environmental protection and the reuse and recycling of waste materials. Participants will also be encouraged to think about the world around them, to express themselves and to think about the ideas with which they could improve the existing situation in their communities.

The methods of work will be in the form of non-formal education and learning from a practical work. The activities of the project will be various and participants will have the chance to enjoy different methodologies such as icebreakers, energizers, warm up activities, group work, discussions, learning by doing, inter-cultural nights and outdoor activities included in a series of workshops and activities connected with environmental protection and recycling. This project is also a great opportunity for young people to learn about another country, culture, language, broaden their horizons and get new ideas for the future.
