

Eco Fighters

Youth Exchange 18/06-24/06/2023

Murzasichle, Poland

The project:

The main objective of the project is to get know participants with the subject of ecology and to show the situation prevailing in Europe and the whole world. Thanks to a carefully prepared method of conducting the workshops, participants will learn how they can become more environmentally friendly and how they can promote this idea in their environment. The main methods of work will be: presentations, discussions, games, art workshops, games, debates and many other detailed activities in the schedule. The environment of the Małopolskie voivodship is a very good example of green areas, which especially need to be taken care of to create better living conditions for the next generations. At the end we will try to answer the question of what is being a European for us? How should you behave to care for the environment?

The Eco Fighters project was created as a result of young people's interest in the subject of environmental protection and ecology. It will take place in June 2023 in Muzasichle with 40 participants from Poland, Croatia, Lithuania, Italy, Romania.

The participants of the project will be people aged between 18 and 25 interested in the subject of ecology. they created a group before starting the project creation, so each participant is maximally involved in the project organization and is interested in acquiring new knowledge in the field of ecology. From the very beginning to the end of the project and after its completion, all participants are actively involved in each stage of writing, conducting and every aspect of the application.

For the most part, these are people who are studying. From the very beginning, the partners were asked to keep the gender balance so that the project would take the same amount of women and men. Thanks to this equality, we will also have a broader view of the subject from the point of view of different sexes.
