„Graffiti- more than art”

Training Course

GENERAL INFORMATION ABOUT THE PROJECT:

The main objective of the project "Graffiti- more than art" is building up the positive reception of so called "street art" through common creation of graffiti by 30 participants from Poland and Lithuania during one mobility taking place in Poland. During activities, participants will increase their knowledge about temporary art represented by modern creators, who join social message with street art. They will improve their manual skills through working with templates, paints and finally creating of graffiti.

During one-week stay in Poland, young people will work on the project by creating graffiti, which promotes positive social relation between people having different points of view and build an intercultural dialogue among those persons. The main aim of the action is presenting graffiti as appreciative medium, that increases attractiveness of public space instead of leaving negative emotions in people's minds, who often connect graffiti with vandalism. To achieve it, participants will take part in activities, which will give them not only abilities required to create graffiti, but also possibilities of leading open discussions about this form of communication as well as it's ethic and communicational side. A key part of the project will be joined preparation of graffiti, leaded by professional graffiti artist, who will prepare workshops about various techniques used in making graffiti.

Project will be implemented in the form of discussions, brainstorming's, workshops, group works, individual works.
