WHAT IS THE PROJECT ABOUT?

The human negative impact on the nature and climate change is not just a myth or a concern of future generations anymore. The effects of the pollution and greenhouse emission are visible in everyday life's of all of us. Air pollution, rising sea levels and soil acidification are only of a few of very real and serious problem we are facing as a human race. We will need innovative approaches and rise of awareness concerning the preservation of our only home we call the planetearth.

Environmental issues are harmful effects of human activity on the biophysical environment.

Environmentalism, a social and environmental movement, addresses environmental issues through advocacy, education and activism.

We want this Youth exchange to be an inspiration for the youngsters so that they can continue acting in a responsible and caring way when it comes to their, our own and the future generations clean and safe environment. We want these young people to be the voice for the preservation of the global wild life both at sea and land, minimization of human made harm to the natural environments and cutting down on unnecessary emissions.

PREPARATION

Remember that each national group has to prepare:

- Group presentation (Who are you?, Where are you from?, What do you do?, Which organisation do you come from?)
- Participants have to be familiar with the culture of their country, because during the meetings, they will have to prepare their own cultural evenings
- Please, bring some traditional treats from your country – some typical snacks or drinks to show how your cuisine looks like, videos, musics, costumes etc.
- If possible, please take your own computers – it will be useful during the sessions.
